Operating Instructions

Digital Video Recorder
Models: DLR3-04/xxx

eneo®

Safety instructions

EMC class

- ► This video recorder (DVR) is a class A device in accordance with EN 55022.
- ► This device may cause interference to other equipment in domestic use. In such cases the persons operating the DVR are required to provide appropriate countermeasures, for which they themselves bear the cost.

Importance of these Operating Instructions

- ► Please read the safety instructions and the other information contained in the Operating Instructions before connecting up and operating the DVR.
- ► The Operating Instructions should be kept in a safe place for later reference.

Ambient conditions for the DVR

- ► The DVR should be protected against excessive heat, dust, damp and vibration.
- ► The DVR may only be operated at temperatures between +5°C and +40°C, and up to a maximum air humidity of 90%.
- ► The DVR may only be operated indoors, and must be protected against incursion of water and damp.

Care of the DVR

- ► Never switch on the DVR when damp has penetrated it. In such cases, have the DVR checked by a qualified service engineer.
- ► Do not place any heavy objects on the DVR.
- ► Never cover over the DVR's vents.
- ► Never insert metal objects or any other items into the vents. This may permanently damage the DVR.
- ► The housing may only be opened by authorised persons. Repairs may only be carried out by qualified service personnel.
- ► The DVR must be disconnected from the power supply before its housing is opened.

Getting started with the DVR

- ► When laying the connecting cables, make sure no weight is placed on them, that they are not kinked or damaged, and that no damp can penetrate them.

Cleaning the DVR

- ► The housing of the DVR may only be cleaned with a damp (not wet) cloth,
- ► Use only a mild detergent. Do not use solvent-containing detergents or petrol. This could permanently damage the surface finish.

Spare parts

- ► Use only original spare parts from Videor E. Hartig GmbH.

Overview

Package contents

- Digital video recorder (DVR)
- Mains power cord
- Operating instructions
- RAS (Remote Administration System) software on CD
- Operating instructions for RAS software on paper and CD
- Mounting kit for cabinet installation

Basic functions

- Record video images using multiple cameras
- Event-based recording start
- Video playback
- Search for specific video sequences

Features

- MPEG-4 compression / duplex mode
- 4 loop-through video channels / VGA, FBAS output
- Audio and alarm inputs / outputs
- Max. recording speed: 100 field images per sec (PAL)
- Memory capacity 250 GB / 500 GB / 750 GB / 1000 GB
- Maximum video resolution 720 x 576 pixels
- Archiving/image transfer via USB and DVD-RW
- Live picture & Playback Zoom (2x)
- Integral Motion Detector
- Telemetry control functions via RS-485 port
- Network connection (Ethernet)

Requirements for operation

- Digital video recorder DLR3 connected
- At least 1 camera (PAL) and 1 monitor connected.
- Mouse connected, if DVR is to be controlled by mouse

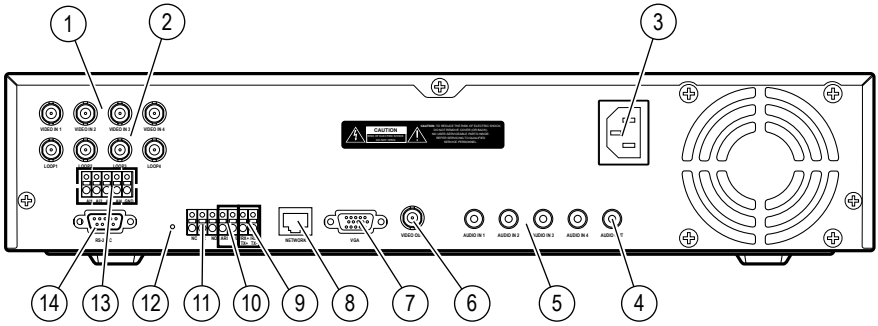
Note: Please refer to www.videor.com for further information.

Control options

- Front panel
- Mouse
- WebGuard
- RAS program

Connections on the rear

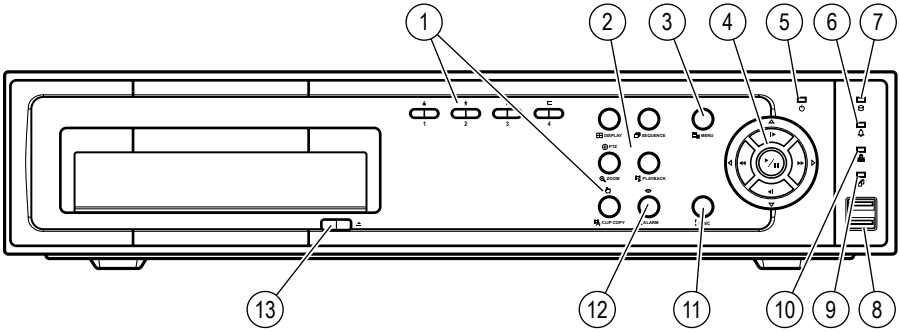
Note: Connections optionally for NTSC or PAL operation.



No.	Designation	Functions/connections	Example devices
1	VIDEO IN 1-4	Max. 4 video channels	Cameras
2	LOOP 1-4	Max. 4 loop-through video channels	Cameras
3	Power supply	Mains power connection	-
4	AUDIO OUT	Audio output	Amplifier, speakers
5	AUDIO IN 1 - AUDIO IN 4	Max. 4 Audio inputs	Microphone
6	VIDEO OUT	Video output	Monitor
7	VGA	PC monitor	PC monitor
8	NETWORK	Network	Network cable
9	/RX+, /RX-, TX+, TX-	External interface (RS-485)	Keyboard, PTZ camera
10	ARI/GND	Reset alarm with external signal	Switch
11	NO, C, NC	Alarm outputs for external devices	Siren, flashing light
12	Reset switch	Reset to factory defaults	-
13	AI1 - AI4	Alarm inputs for external devices	Sensors
14	RS-232C	External interface	Remote Control

Front panel controls

The following diagram and table set out the controls on the front panel of the DVR:



No.	Designation	Function
1	1 to 4	Selecting the camera and inputting passwords (primary usage)
	PTZ camera functions	PTZ camera functions (secondary assignment)
2	SEQUENCE, DISPLAY, PTZ, ZOOM, PLAYBACK, CLIP COPY	Function buttons
3	MENU	Open/quit menu structure
4	▶/II ◀◀ ▶▶ ◀I I▶	Playback functions (primary assignment)
	Menu navigation	Navigate and select within the menu structure (secondary assignment)
5	⏻	Power-on indicator when DVR is in operation
6	🔔	Display at alarm
7	⛁	Indicates hard disk operation
8	Connections	USB ports
9		Indicates recordings being copied
10		Indicates Ethernet connection
11	PANIC	Start/end panic recording
12	ALARM	• Reset alarm • View event list
13	⏏	Open built-in DVD-RW writer

Key to controls

Function buttons

Note: The secondary function assignment is accessed by holding down the key.

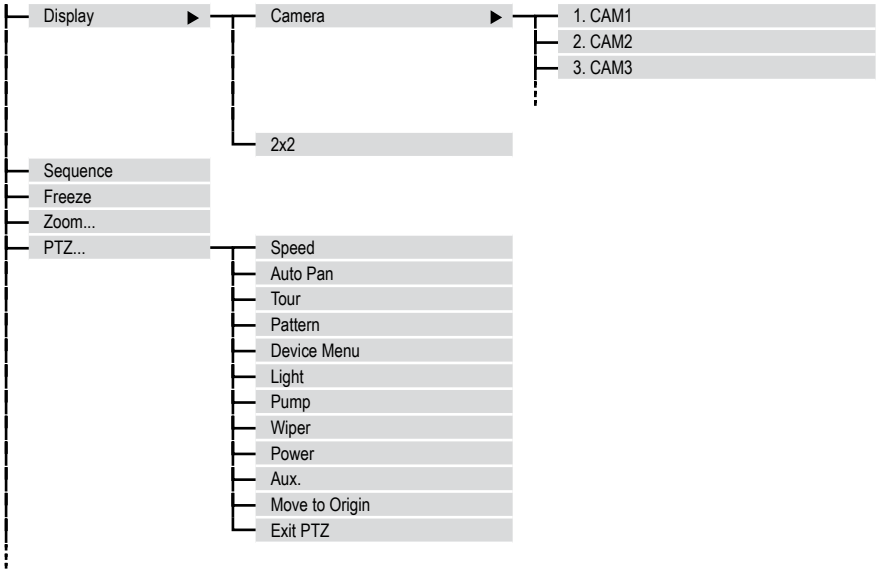
Menu structure

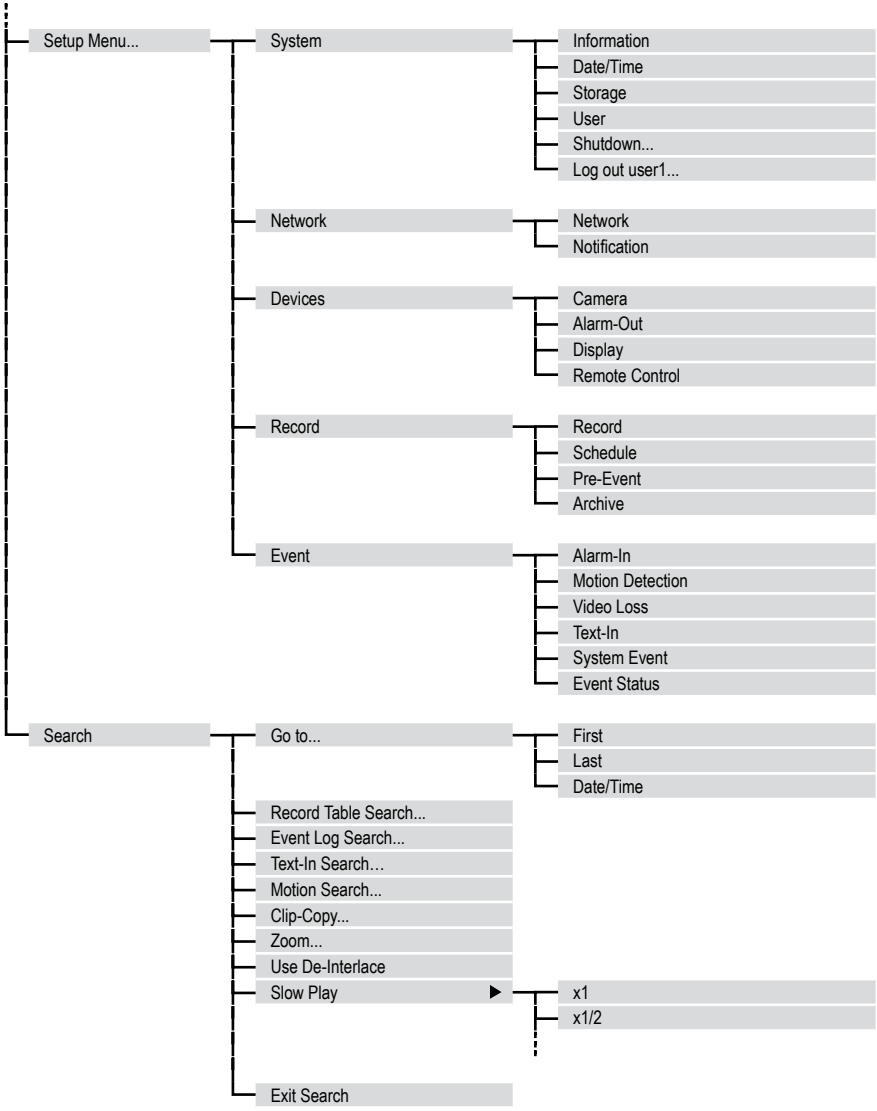
The following illustration shows the structure of the complete menu tree that is accessible using the mouse control:



Note: The number of menu entries in the PTZ menus differs depending on the camera model selected.

Menu structure (continued)

The following illustration shows the structure of the complete menu tree that is accessible using the mouse control:



Accessing the menus

Accessing the Display menu

Requirement:

- The current camera image is shown in full image or quad image.

Step	Action	Access using	Key sequence/menu path
1	Open Display menu...	Device	
		Mouse	Display

Accessing the PTZ menu

Requirement:

- A PTZ camera is connected and configured.
- Current camera image is shown as a full image.

Step	Action	Access using	Key sequence/menu path
1	Open PTZ menu... **Result:** Menu of the configured PTZ camera is shown.	Device	>
		Mouse	PTZ...

Accessing the menus, continued

Accessing the Setup menu

Requirement:

- The current camera image is shown in full image or quad image.

Step	Action	Access using	Key sequence/menu path
1	Open Setup Menu... **Result:** Prompt for user name and password.	Device	
		Mouse	Setup Menu...
2	Log in as user. User name: admin Password: (blank) **Note:** Use default access data only for first-time access.		

Accessing the Search menu

Requirement:

- The current camera image is shown in full image or quad image.

Step	Action	Access using	Key sequence/menu path
1	Open Search menu... **Result:** Search for recorded images is activated.	Device	>
		Mouse	Search

Getting started

Checklist for DVR operation

Step	Action	Menu path
1	Connect peripheral devices as per planned setup.	
2	Specify menu language.	Setup Menu... > System > Information
3	Adjust date and time.	Setup Menu... > System > Date/Time
4	Set up user.	Setup Menu... > System > User
5	Set up network and desired notification channels (optional).	Setup Menu... > Network > ...
6	Register peripherals with DVR.	Setup Menu... > Devices > ...
7	Set up event types and associated responses.	Setup Menu... > Event > ...
8	Set up recording parameters and schedule.	Setup Menu... > Record > ...

Switching on the DVR

Requirement:

- At least 1 camera (PAL) connected.
- The start-up preparations are complete.

Step	Action
1	Plug in DVR mains plug. **Result:** The video recorder starts up automatically, checking the connected video inputs.
2	Switch on monitor. **Result:** System is ready to use.

Switching off the DVR

Requirement:

- You have accessed the Setup menu.

Step	Action	Menu path
1	Shut down the system. **Result:** System shuts down automatically.	Setup Menu... > System > Shutdown...
2	After shutdown, disconnect the mains plug.	

Saving your system setup

You can save your DVR's setup data, including its network configuration.

Requirement:

- USB memory stick
- Software versions must be compatible

Step	Action	Menu path
1	Insert a USB memory stick into one of the USB ports.	
2	Export your setup.	Setup menu... > System > Information > Setup Export...
3	Specify a file name.	
4	Export your setup.	Export

Loading your system setup

You can load your stored DVR system setup with or without its network configuration.

Requirement:

- USB memory stick with stored setup
- Software versions must be compatible

Step	Action	Menu path
1	Insert a USB memory stick into one of the USB ports.	
2	Import your setup.	Setup menu... > System > Information > Setup Import...
3	Select the file name and, where appropriate, the network configuration.	
4	Import your setup.	Import

Deleting recordings

You can only delete all your recordings together. It is not possible to delete recordings from a specific time period.

Step	Action	Menu path
1	Delete all recordings.	Setup Menu... > System > Information > Clear All Data... or Setup menu... > System > Storage > Information tab > Using > Clear

Downloading software updates

You can download software updates for your DVR from a USB memory stick.

Requirement:

- USB memory stick with latest software release

Step	Action	Menu path
1	Insert a USB memory stick into one of the USB ports.	
2	Start update.	Setup Menu... > System > Information > Upgrade...
3	Install new release.	

Hiding from specific users

You can hide video images and camera data according to the preset user rights.

Step	Action	Menu path
1	Set camera Covert mode.	Setup Menu... > Devices > Camera > Settings
2	Cancel ‘Covert Camera View' access for specific users (groups).	Setup Menu... > System > User

Restoring factory defaults

Before restoring the factory defaults, you should export your current system settings in case you need to re-import them later. (see *Saving your system setup and Loading your system setup*)

Step	Action
1	Shut down the system.
2	Disconnect the mains plug.
3	Push a paper clip into the Reset button (on the rear of the DVR) and hold it there.
4	Plug in the mains plug.
5	Wait for all the LEDs to flash 5 times (about 30 seconds).
6	Withdraw the paper clip.

Determining the memory requirement of a recording

The amount of memory recorded video sequences will take up depends on the following factors:

- Picture quality
- number of images per second
- duration

The memory requirement for 1 camera is calculated by this formula:

Memory requirement = picture size x duration of recording x images per second

Calculation example: CIF resolution (PAL):

Picture quality	Picture size	Duration of recording	Approx. memory space		
			5 images/s	10 images/s	25 images/s
Low	2.4 kB	24 hours	1.04 GB	2.07 GB	5.18 GB
Standard	4.8 kB	24 hours	2.07 GB	4.15 GB	10.37 GB
High	9.6 kB	24 hours	4.15 GB	8.29 GB	20.74 GB
Very High	14.4 kB	24 hours	6.22 GB	12.44 GB	31.10 GB

Calculation example: 2CIF resolution (PAL):

Picture quality	Picture size	Duration of recording	Approx. memory space		
			5 images/s	10 images/s	25 images/s
Low	4.8 kB	24 hours	2.07 GB	4.15 GB	10.37 GB
Standard	9.6 kB	24 hours	4.15 GB	8.29 GB	20.74 GB
High	19.2 kB	24 hours	8.29 GB	16.59 GB	41.47 GB
Very High	28.8 kB	24 hours	12.44 GB	24.88 GB	62.20 GB

Searching for recordings

Find first stored recording

Search ⇨ **Go to...** ⇨ **First**

Find last stored recording

Search ⇨ **Go to...** ⇨ **Last**

Find recording by date and time

Search ⇨ **Go to...** ⇨ **Date/Time**

Record table search

The search recording table shows a time beam of the recording time intervals of all cameras.

Search ⇨ **Record Table Search...**

Event log search

The event log search enables you to search for events based on specific criteria, such as:

- movements recorded by a specific camera
- alarm from a specific alarm input
- System events

Search ⇨ **Event Log Search...**

Text-in search

The text-in search enables you to search for recordings based on specific text inputs.

Search ⇨ **Text-In Search…**

Motion search

The motion search function can detect movements in recordings within defined zones for one camera. 2 types of motion search are possible:

- Motion search: Search for movement in a defined zone.
- Museum search: Search for movement of a defined object.

Search ⇨ **Motion Search...**

Copying recordings

Recordings can be written to a CD or copied to a USB memory stick.

Search ⇨ **Clip-Copy...**

Using record table search

Performing a record table search

Step	Action	Menu path
1	Open record table search. **Result:** The recording table (standard view) is displayed.	Search > Record Table Search...
2	Locate recordings. **Result:** The current seach position is shifted.	▷

Search ⇨ **Record Table Search...**

Symbol	Meaning
✖	Quit record table screen
1. CAM1	Camera name
	Hours display
⧗	Display of current search position
⇕	Open expanded view
⧗	Open standard view
🔍+	Zoom in
🔍−	Zoom out
	Display Calender Search >>
	Indicates search menu
⏮ ◀◀ ◀ ▷ ▶ ▶▶ ⏭	Search functions

⇨ **Calendar Search...**

Term	Symbol	Meaning
		Date display ● Grey: No recording available ● White: Recording available

Using event log search

Performing an event log search

Step	Action	Menu path
1	Open event log search. **Result:** The result of the last search is displayed.	Search > Event Log Search...
2	Define criteria.	Option...
3	Confirm input. **Result:** List of search results is displayed.	Search
4	Select desired entry from list.	

Search ⇨ **Event Log Search...** ⇨ **Option...**

Term	Symbol	Meaning
From First	☑ [...]	Start date
To Last	☑ [...]	End date
Check Time Overlap	☑	Activates a system prompt if there are multiple recordings for the same time range
Alarm-In	[...]	Alarm inputs in response to which a search for events is to start
Motion	[...]	Cameras on which to search for motion detection
Video Loss	[...]	Cameras on which to search for video loss
Text-In	[...]	Text input devices on which to search for events
Record Channels	[...]	Cameras on which to search for events
	☑ ☑ ☑	Search for system events: Setup Menu... > Event > System Event > Actions

Using text-in search

Performing a text-in search

Step	Action	Menu path
1	Open text-in search. **Result:** The result of the last search is displayed.	Search > Text-In Search...
2	Define text inputs.	Option...
3	Confirm input. **Result:** List of search results is displayed.	Search
4	Select desired entry from list.	

Using text-in search (continued)

Search ⇨ **Text-In Search…** ⇨ **Option...**

Term	Symbol	Meaning
From First	☑ [...]	Start date
To Last	☑ [...]	End date
Channels	☐ ☑	Text input devices on which to search for events
		Type of text input:
	[▾]	Any Text-In Product
		Generic Text
		Epson
No.	☑	Numbers of text elements to search for
		Linking operator for different query conditions:
-	[▾]	(blank)
		AND
		OR
Name	[...]	Text field by which the search should be made
Comp.	[▾]	Comparison conditions
Value	[...]	Numerical value against which the comparison is to be made
Column	[...]	Column number
Line	[...]	Line number
X	[...]	Delete search parameter
+	[▾]	Add new set of search parameter
Case Sensitive	☑	Makes search case-sensitive
Load	☐	Load saved search option settings
Save	☐	Save current search option settings

Using motion search

Performing a motion search

Step	Action	Menu path
1	Display desired camera in single frame.	Display > Camera > ...
2	Open motion search.	Search > Motion Search...
3	Enter settings for motion search.	Option...
4	Confirm input. **Result:** List of search results is generated.	Search
5	Select desired entry from list.	

Search ⇨ **Motion Search...** ⇨ **Option...**

Term	Symbol	Meaning	
From First	☑ [...]	Start date	
To Last	☑ [...]	End date	
Type	[▾]	Type of search:	
		Motion Search	Search for movement in a defined zone
		Museum Search	Search for movement of a defined object.
Zone	[...]	Definition of motion-sensitive zones for motion search or museum search: *See "Zone" on page 45.*	
Sensitivity	[▾]	Sensitivity of motion detection of:	
		1 (Dull)	
		2	
		3	
		4	
		5 (Sensitive)	
Min. Blocks	[...]	Motion search only (not museum search): Specify in how many motion-sensitive blocks motion must be detected as a minimum to trigger an alarm	

Copying recordings

Copying recordings to CD or USB memory stick

Step	Action	Menu path
1	Find desired recordings. **Note:** Make a note of the data of the recordings you want to copy.	Search > ...
2	Define settings.	Search > Clip-Copy...
3	Start copying. **Result:** The recordings are copied.	Start

Search ⇨ **Clip-Copy...**

Term	Symbol	Meaning

		Internal DVD-RW
		USB-CD-RW
		1. USB Storage
		2. USB Storage
		3. USB Storage
File name	...	Name of file on destination medium
Progress	☐	Copy status

Menu descriptions – Setup menu

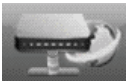
The Setup menu has the following sub-menus:

System menu

On the “System” menu

- the basic settings are made
- users are administered
- the system is shut down.

Network menu



On the “Network” menu the network settings are made. Network access provides access to all the functions of the DVR via

- WebGuard, same access using Internet Explorer
- RAS (Remote Administration System), independent of Internet Explorer

The DVR can be configured so that alarms trigger a notification by e-mail or notify an RAS.

Devices menu

On the “Devices” menu the connected peripheral devices are configured. Possible peripherals are:

- Cameras
- Microphones and speakers (through amplifier)
- Sirens and signal lamps
- Monitors
- Remote control for PTZ

Record menu

On the “Record” menu the following settings are made:

- Recording quality
- Timer control
- Duration of pre-event recording

Event menu

On the “Event” menu the following settings are made:

- Assignment of alarm inputs to alarms
- Configuration of motion-sensitive zones individually for each camera
- Definition of text input device and assignment to alarms
- Response to undesirable events

The event status is additionally displayed.

Setup menu

System – Information

On the “Information” menu

- basic information is entered and displayed
- software updates are installed
- recorded data are deleted as required

Setup Menu... ⇨ **System** ⇨ **Information**

Term	Symbol	Meaning
Site	...	Location of DVR
System ID	...	ID for remote keypad ● The remote keypad and DVR must be set to the same ID.
Language	▾	Menu language
Version		Version of DVR software
Upgrade...		Starts installing latest version of software via USB port
Import...		Import setup
Export...		Export setup
Show System Log...		Show log of all actions and events
Recorded Data		
From		Date of oldest recording
To		Date of newest recording
Clear All Data...		Deletes all stored data

Setup menu (continued)

System – Date/Time

On the “Date/Time” menu

- time and date settings are made
- dates of public holidays are entered
- time synchronisation is configured.

Setup Menu... ⇨ **System** ⇨ **Date/Time** ⇨ **Date/Time**

Term	Symbol	Meaning
Date	...	Date
Format	▾	Date display format
Time	...	Time
Format	▾	Time display format
Time Zone	▾	Local time zone
Use Daylight Saving Time	☑	Activates use of summertime Daylight Saving Time

Setup Menu... ⇨ **System** ⇨ **Date/Time** ⇨ **Holiday**

Term	Symbol	Meaning
No.		Number of entered public holiday
Date	...	Date of each desired public holiday
X	...	Delete holidays
+	...	Set up holidays

Setup Menu... ⇨ **System** ⇨ **Date/Time** ⇨ **Time Sync.**

Term	Symbol	Meaning
Automatic Sync.	☑	Activates synchronisation with time server
Time Server		IP address or domain name of time server
Interval	▾	Synchronisation interval
Last Sync-Time		Time of last synchronisation
Run as Server	☑	Activates use of the DVR as the time server

Setup menu (continued)

System – Storage

On the “Storage” menu the status and usage of the available storage media is displayed.

Setup Menu... ⇨ **System** ⇨ **Storage**

Term	Symbol	Meaning
Type		Type of storage medium
Capacity		Size of storage medium
Status		Status of storage medium >>
Information		Time range of recorded data >>
Format		Storage medium usage >>

⇨ **Status**

Term	Symbol	Meaning
Disk Bad		Data carrier status
Temperature		Temperature status
S.M.A.R.T.		Result of S.M.A.R.T. check

⇨ **Information**

Term	Symbol	Meaning
From		Start date of recorded data
To		End date of recorded data
Clear		Delete all recordings

Setup menu (continued)

Format

Term	Symbol	Meaning	
Use as		Use of storage medium:	
		Record	
		Not using	
Partition		Activating permits:	
		CD/DVD burn	Reserves a data buffer as a separate partition. This is essential for burning CD&DVDs, and must be activated for a storage medium with „Record“ usage.
Format		Formatting deletes the recordings from the hard disk	

Setup menu (continued)

System – User

On the “User” menu the user groups and individual users are set up.

Setup Menu... ⇨ **System** ⇨ **User**

Term	Symbol	Meaning
Group & User, Group field		Assignment of group access privileges Table of possible group access privileges >>
Group & User, User field		Set password
+ Group...		Add a new group
+ User...		Add a new user Set password
Auto Login		User to be logged in automatically
Auto Logout		Time after which logged-in user is automatically logged out

⇨ **Table of possible group access privileges**

Group access privilege	Meaning
Shutdown	May shut down the DVR
Upgrade	May install a new firmware version
System Time Change	May change the time setting
Data Clear	May delete recording data
Setup	May make changes anywhere on the Setup menu
Colour Control	May change the picture settings
PTZ Control	May control PTZ cameras
Alarm-Out Control	May reset alarms
Covert Camera View	May view video images from covert cameras
System Check	May interrogate system status
Record Setup	May make changes to the Record menu
Search	May use Search mode
Clip-Copy	May copy video images

Setup menu (continued)

System – Shutdown

Setup Menu... ⇨ System ⇨ Shutdown...

System – Log out user1...

Setup Menu... ⇨ System ⇨ Log out user1...

Network – Network

On the “Network” menu all settings required to ensure network access are made.

Setup Menu... ⇨ Network ⇨ Network ⇨ Network

Term	Symbol	Meaning	
Transfer Speed	...	Transmission bandwidth:	
		(bps)	bits per second
		(ips)	images per second
Quality		Quality of picture transmission via network (PAL):	
		Very High	14,4 kB/picture
		High	9,6 kB/picture
		Standard	4,8 kB/picture
		Basic	2,4 kB/picture
Remote Audio Channel		Selecting Audio Channel	
		Select From RAS	
		1 - 4	

Setup menu (continued)

Setup Menu... ⇨ Network ⇨ Network ⇨ LAN

Term	Symbol	Meaning	
Type		Type of connection to DVR:	
		Manual	Manual connection required input of: ● IP Address ● Gateway ● Subnet Mask
		DHCP	Automatic assignment of IP address of DNS server
		ADSL (with PPPoE)	Requires following input as specified by provider: ● ID ● Password
DNS Server	...	Address of DNS server	
Port Number Setup...		Definition of port numbers needed to access the DVR via the RAS software or via WebGuard	

Setup menu (continued)

Setup Menu... ⇨ Network ⇨ Network ⇨ DVRNS

Term	Symbol	Meaning
Use DVR Name Service	☑	Enables the DVR name service
DVRNS Server	...	IP address or domain name of DVRNS server DVRNS = Digital Video Recorder Name Service
Port	...	Port for DVRNS
Use NAT	☑	Enables NAT (Network Address Translation) use
DVR Name	...	Name by which the DVR is to be registered with the DVRNS server
Check		Check DVR name for usability after entering
Help Desk		Information from help desk if DVRNS setting correct

Setup Menu... ⇨ Network ⇨ Network ⇨ WebGuard

Term	Symbol	Meaning
Use WebGuard Service	☑	WebGuard Service activated
Port	...	Port for the WebGuard Service

Setup menu (continued)

Network – Notification

On the “Notification” menu the method of notification is defined.

Setup Menu... ⇨ Network ⇨ Notification ⇨ Mail

Term	Symbol	Meaning
Enable	☑	Enables notification by e-mail
SMTP Server	...	IP address or domain name of SMTP server
Port	...	Port for SMTP server Default is port 25.
Use SSL/TLS	☑	Activates the Encryption
Authentication	☐	Login to SMTP server
Sender	...	E-mail address of sender
Recipient	...	E-mail address of recipient

Setup Menu... ⇨ Network ⇨ Notification ⇨ Callback

Term	Symbol	Meaning
LAN	☑	Enables notification of an RAS via LAN
No.		Number of IP address
IP Address	...	IP addresses of RAS PCs
Retry	▾	Number of notification attempts by the DVR in the event of an error

Setup menu (continued)

Devices – Camera

On the “Camera” menu the cameras are configured.

Setup Menu... ⇨ **Devices** ⇨ **Camera** ⇨ 🗀 **Settings**

Term	Symbol	Meaning	
No.	☑	Activates the cameras	
Title	...	Name of camera	
Use	▾	Visibility of recordings and camera data depending on user access privileges:	
		Normal	All users see all camera data and all recordings
		Covert1	Users without relevant access see camera title, status symbol, but no recordings
		Covert2	Users without relevant access see only camera title, but no recordings

Setup Menu... ⇨ **Devices** ⇨ **Camera** ⇨ 🗀 **PTZ**

Term	Symbol	Meaning
No.		Number of camera

ID	...	Unique ID of PTZ camera
Port	▾	Interface type of PTZ cameras
Setup…	☐	Settings as specified by PTZ camera manufacturer:
		Baud Rate
		Data Bit
		Stop Bit
		Parity

Setup menu (continued)

Devices – Audio

On the “Audio” menu the audio outputs are assigned to the cameras.

Setup Menu... ⇨ **Devices** ⇨ **Audio**

Term	Symbol	Meaning
No.		Number of audio output
Associated Camera		Assignment of camera
Enable Audio-Out	☑	Enables all audio outputs

Devices – Alarm-Out

On the “Alarm-Out” menu the alarm outputs are configured.

Setup Menu... ⇨ **Devices** ⇨ **Alarm-Out**

Term	Symbol	Meaning	
Dwell Time		Duration of alarm signal	
No.		Number of schedule entry	
Day		Day of the week	
Range	...	Time range at 15-minute intervals	
Mode		Response in defined period:	
		Event	Alarm in response to event
		On	Continuous alarm
		Off	No alarm
Alarm-Out	...	Enable ● Alarm outputs ● internal beep by DVR	
X	...	Delete schedule entry	
+	...	Set up schedule entry	

Devices – Display

On the “Display” menu the mode of on-screen display is configured.

- “OSD” tab: Specify what additional information is displayed on-screen.
- “Main Monitor” tab: Specify how the camera images are displayed on the main monitor.

NOTE:

With the DLR3-04 recorder, only one of the two principal monitor outputs can be used at once. If a VGA monitor is connected to the recorder, the FBAS output is automatically switched off. Consequently, switching is not possible. In the event that a VGA monitor which is connected is not automatically recognised, it can be activated manually by holding down the panic button for 5 seconds.

Setup Menu... ⇨ **Devices** ⇨ **Display** ⇨ **OSD**

Term	Symbol	Displayed symbol	Meaning
Progress			Activates display of:
Zoom	☑		Visible when Zoom mode enabled
Network	☑		Visible when DVR operating in a network
Freeze & Sequence	☑		• Freeze • Visible when Sequence mode enabled
Free Space	☑		• Visible when Recycle mode enabled • Remaining hard disk capacity, if Recycle mode not selected
Date	☑	-	Date
Time	☑	-	Time
User Name	☑	-	Display of user name
Camera			Activates display of:
No.	☑	-	Display of camera number
Title	☑	-	Display of camera title
Record	☑		Display of Record symbols
PTZ	☑	PTZ	Visible when PTZ camera is displayed
Text-In	☑	-	Display of character string
Display Dwell	▾	-	Text In Dwell Time
Transparency	...	-	Transparency of menu screens
OSD Margin...	...	-	Distance of displayed symbols from screen margin

Setup menu (continued)

Setup Menu... ⇨ Devices ⇨ Display ⇨ Main Monitor

Term	Symbol	Meaning
Interval		Time interval between picture refresh
Event Monitoring On		Displays image of relevant camera in full-screen mode when an event occurs

Devices – Remote Control

On the “Remote Control” menu the remote control function is configured.

Setup Menu... ⇨ Devices ⇨ Remote Control

Term	Symbol	Meaning
Port		Interface type of remote control
Setup…		Setup as specified by manufacturer:
		Baud Rate
		Data Bit
		Stop Bit
		Parity
Remote Control Product		Remote control type as per specified list

Setup menu (continued)

Record – Record

On the “Record” menu the basic settings for recordings and their quality are made.

Setup Menu... ⇨ **Record** ⇨ **Record**

Term	Symbol	Meaning	
Recycle	☑	Enables automatic overwriting of the oldest recordings when the hard disk is full **Note:** If not enabled, recording ends when the hard disk is full.	
Resolution	▭▾	Quality of recorded images	
		Standard	CIF
		High	2CIF
		Very High	D1
Event Record Dwell	▭▾	Duration of recording when an event occurs	
Auto Deletion	▬	Specify time after which automatically deleted	
Use Panic Recording	☑	Enables the panic recording function	
Panic Recording Duration	▭▾	Duration of panic recording	
		No Limit	End panic recording by pressing PANIC button
		xx min.	Panic recording ends after preset time or by pressing PANIC button
ips	▭▾	Number of recorded images per second in panic recording	
Quality	▭▾	Picture quality of the recorded images in panic recording	

Setup menu (continued)

Record – Schedule

On the “Schedule” menu the schedule for recording is defined.

Setup Menu... ⇨ **Record** ⇨ **Schedule**

Term	Symbol	Meaning	
Schedule On	☑	Enables schedule entries **Note:** A recording is made only if schedule entries are enabled. Otherwise only panic recording is possible.	
	▾	Time schedule mode for events:	
		Simple Mode	
		Advanced Mode	
		Note: All event and action states are reset when the mode is changed.	
No.		Number of schedule entry	
Day	▾	Day of the week	
Range	...	Time range at 15-minute intervals	
Mode	▾	Response:	
		No Record	-
		Time	Always record in the defined time slot in the quality set for “Time” mode
		Event	Record only in case of event in the defined time slot in the quality set for „Event“ mode
		Time & Event	Always record in the defined time slot in the quality set for “Time” mode, also in case of event in the defined time slot in the quality set for “Event” mode
Channels	☑	Assignment of cameras to schedule	
Settings	▾	Picture data settings:	
		ips	Number of recorded images per second
		Quality	Picture quality of recorded images

Term	Symbol	Meaning	
X	...	Delete schedule entry	
+	...	Set up schedule entry	
Default...		Picture data defaults in Time and Event modes:	
		ips	Number of recorded images per second
		Quality	Picture quality of recorded images

Record – Pre-Event

On the “Pre-Event” menu the settings for recording prior to the event are made.

Setup Menu... ⇨ **Record** ⇨ **Pre-Event**

Term	Symbol	Meaning
No.	☑	Activates the cameras
ips	▾	Number of recorded images per second prior to the event
Quality	▾	Picture quality of the recorded images prior to the event
Dwell	▾	Recording time prior to the event **Note:** The pre-event recording memory capacity is limited. Consequently, the maximum recording time prior to the event, the number of recorded images and picture quality are inter-dependent.

Setup menu (continued)

Event – Alarm-In

On the “Alarm-In” menu the alarm inputs and responses to events are configured.

Setup Menu... ⇨ **Event** ⇨ **Alarm-In** ⇨ 🗀 **Settings**

Term	Symbol	Meaning	
No.	☑	Enables the alarm inputs	
Title	...	Name of alarm input	
Type	▾	Contact method of alarm input:	
		NO	Normally Open
		NC	Normally Closed

Setup Menu... ⇨ **Event** ⇨ **Alarm-In** ⇨ 🗀 **Actions**

Term	Symbol	Meaning
No.		Number of alarm input
Record	...	Assignment of cameras to record in event of alarm These cameras must be in “Event” or “Time and Event” mode within the time slot: Setup Menu... > Record > Schedule
Alarm-Out	... ☑	Assign and enable ● alarm outputs ● internal beep by DVR These alarm outputs and the internal beep must be enabled within the time slot: Setup Menu... > Devices > Alarm-Out > Schedule
Notify	... ☑	Assign and enable notifications: Mail LAN 1 to LAN 5 Alert Window The selected function must be enabled: Setup Menu... > Network > Notification
PTZ	... ▾	Select PTZ cameras to record in event of alarm and select the desired settings

Setup menu (continued)

Event – Motion Detection

On the “Motion Detection” menu the motion-sensitive zones are defined and responses to events configured.

Setup Menu... ⇨ **Event** ⇨ **Motion Detection** ⇨ **Settings**

Term	Symbol	Meaning	
No.	☑	Enables motion detection for the camera	
Sensitivity	...	Sensitivity of motion detection:	
		Daytime	
		Nighttime	
Zone	...	Select the motion-sensitive blocks within the time slot Left mouse button functions: ● Click to select/deselect ● Click - hold down - drag to define a zone for selection/deletion/back Right mouse button functions or menu in time slot to select blocks:	
		Select	Select complete row of blocks
		Clear	Clear selection of a row
		Reverse	Reverse selection of a row
		Select All	Select all blocks
		Clear All	Clear selection of all blocks
		Reverse All	Reverse selection of all blocks
Min. Blocks	...	Specify in how many motion-sensitive blocks motion must be detected as a minimum to trigger an alarm:	
		Daytime	
		Nighttime	
Zone View	☑	Mark the motion-sensitive zones (red in event of motion)	
Motion Ignoring Interval	▾	Time interval between 2 events logged as separate events:	
		Never	Each motion detection is logged as a separate event.
Daytime Setup...	▭	Definition of “Daytime” time range	

Setup menu (continued)

Setup Menu... ⇨ Event ⇨ Motion Detection ⇨ Actions

Term	Symbol	Meaning
No.		Number of alarm input
Record	...	Assignment of cameras to record in event of alarm These cameras must be in “Event” or “Time and Event” mode within the time slot: Setup Menu... > Record > Schedule
Alarm-Out	... ☑	Assign and enable ● alarm outputs ● internal beep by DVR These alarm outputs and the internal beep must be enabled within the time slot: Setup Menu... > Devices > Alarm-Out > Schedule
Notify	... ☑	Assign and enable notifications: Mail LAN 1 to LAN 5 Alert Window The selected function must be enabled: Setup Menu... > Network > Notification
PTZ	... ▾	Select PTZ cameras to record in event of alarm and select the desired settings

Setup menu (continued)

Event – Video Loss

On the “Video Loss” menu checking for covert cameras and the responses to events are configured.

Setup Menu... ⇨ **Event** ⇨ **Video Loss** ⇨ **Settings**

Term	Symbol	Meaning	
Check Obscuration		Sensitivity of check as to whether camera is covert:	
		Never	not checked
		15	very sensitive

Setup Menu... ⇨ **Event** ⇨ **Video Loss** ⇨ **Actions**

Term	Symbol	Meaning
No.		Number of covert camera
Record		Assignment of cameras to record in event of alarm These cameras must be in “Event” or “Time and Event” mode within the time slot: Setup Menu... > Record > Schedule
Alarm-Out		Assign and enable ● alarm outputs ● internal beep by DVR These alarm outputs and the internal beep must be enabled within the time slot: Setup Menu... > Devices > Alarm-Out > Schedule
Notify		Assign and enable notifications Mail LAN 1 to LAN 5 Alert Window The selected function must be enabled: Setup Menu... > Network > Notification
PTZ		Select PTZ cameras to record in event of alarm and select the desired settings

Setup menu (continued)

Event – Text-In

On the “Text-In” menu the text input device is defined and the responses to text input are configured.

Setup Menu... ⇨ **Event** ⇨ **Text-In** ⇨ **Settings**

Term	Symbol	Meaning
No.		Number of text input device
Setup		Configuration of text input >>
Title	...	Name of text input

Setup menu (continued)

Setup

Term	Symbol	Meaning
Port	▾	Interface
Setup…	☐	Setting as specified by manufacturer of text input device (ATM, cash-till etc.):
		Baud Rate
		Data Bit
		Stop Bit
		Parity
Text-In Product	▾	Type of text input:
		Generic Text
		Epson
Transaction Start	...	Character string with which text input must start for the DVR to respond
Any Character	☑	DVR responds to any character
Transaction End	...	Character string with which text input must end for the DVR to respond
0 more line(s)	▾	Enables recording of n more lines
Line Delimiter	...	Line delimiter as specified by the text input device manufacturer: ^J for LF or ^M for CR
Ignore String	...	Character string in the text input which the DVR is to ignore All transmittable character strings are specified by the text input device manufacturer.
Case Sensitive	☑	Case sensitivity according to text input device manufacturer's specification
Time Out	▾	Waiting time after the last string

Setup menu (continued)

Setup Menu... ⇨ Event ⇨ Text-In ⇨ Actions

Term	Symbol	Meaning
No.		Number of alarm input
Record	...	Assignment of cameras to record in event of alarm These cameras must be in “Event” or “Time and Event” mode within the time slot: Setup Menu... > Record > Schedule
Alarm-Out	... ☑	Assign and enable ● alarm outputs ● internal beep by DVR These alarm outputs and the internal beep must be enabled within the time slot: Setup Menu... > Devices > Alarm-Out > Schedule
Notify	... ☑	Assign and enable notifications: Mail LAN 1 to LAN 5 Alert Window The selected function must be enabled: Setup Menu... > Network > Notification
PTZ	... ▾	Select PTZ cameras to record in event of alarm and select the desired settings

Setup menu (continued)

Event – System Event

On the “System Event” menu the self-diagnostics and corresponding messages are configured..

Setup Menu... ⇨ **Event** ⇨ **System Event** ⇨ **Health Check**

Term	Symbol	Meaning
System		System self-diagnostics interval
Check Recording		Setup... . Configuration of schedule >>
Check Alarm-In		Interval for checking Alarm Inputs

⇨ **Setup**

Term	Symbol	Meaning
Schedule On		Enables schedule entries
No.		Number of schedule entry
Day		Day of the week
Range		Time range at 15-minute intervals
Interval		Checking interval
X		Delete schedule entry
+		Set up schedule entry

Setup Menu... ⇨ **Event** ⇨ **System Event** ⇨ **Storage**

Term	Symbol	Meaning
Disk Bad Notify		Percentage of bad sectors on hard disk as from which an alarm is triggered
Disk Almost Full Notify		Percentage hard disk space available as from which “Disk Almost Full” alarm is triggered
Disk S.M.A.R.T.		Input of the temperature threshold (in degrees centigrade or Fahrenheit) for the data carrier S.M.A.R.T. test. If the temperature limit is exceeded an alarm is triggered. For details of your hard disk’s temperature limit refer to the manufacturer’s manual.

Setup menu (continued)

Setup Menu... ⇨ Event ⇨ System Event ⇨ Actions

Term	Symbol	Meaning	
Event		Events (based on checks):	
		System	System check failed
		Panic Record	Panic recording in progress
		Check Recording	Recording check failed
		Check Alarm-In	Check of alarm inputs failed
		Disk Almost Full	Preset limit value for hard disk capacity reached
		Disk Full	Hard disk full
		Disk Bad	Preset limit value for number of bad sectors reached
		Disk Temperature	Preset temperature limit reached
		Disk S.M.A.R.T.	S.M.A.R.T. check failed
Alarm-Out	... ☑	Assign and enable • alarm outputs • internal beep by DVR **Note:** Not possible for system event and panic recording	
Notify	... ☑	Assign and enable notifications:	
		Mail	
		LAN 1 to LAN 5	(not in case of system event)
		Alert Window	(not in case of system event)
		The selected function must be enabled: Setup Menu... > Network > Notification	

Setup menu (continued)

Event – Event Status

The “Event Status” menu indicates the status of all possible events:

- Grey text: Event detection not enabled
- White text: Event detection enabled
- Flashing border: Message – acute event for 5 sec
- Yellow field: Pending event

Setup Menu... ⇨ **Event** ⇨ **Event Status** ⇨ **Event Status**

Term	Event
Alarm-In	At alarm input 1 to 4
Check Alarm-In	Error detected at one of alarm inputs 1 to 4
Motion	Motion detected on camera 1 to 4
Video Loss	Video loss on camera 1 to 4
Text-In	Text input on text input device 1 to 4
Panic Record	Panic recording
Check Recording	On checking the recording
Disk Almost Full	On checking the data medium (only if DVR is not operating in Overwrite mode)
Disk Full	On checking the data medium (only if DVR is not operating in Overwrite mode)
Fan Error	Error of fan

Setup Menu... ⇨ **Event** ⇨ **Event Status** ⇨ **Storage**

Term	Meaning
Type	Memory type
Disk Bad	Data carrier status
Temperature	Data carrier status
S.M.A.R.T.	Result of S.M.A.R.T. check

WebGuard – WebWatch controls

The following diagram and table set out the functions on the Web Watch:

No.	Designation	Function
1		WebGuard Logging out
2		Open Search (WebSearch)
3	DVR	Date/Time, IP Address, User Name
4		Image display modes
5	Camera image	Camera name, Enable Audio, Image Aspect Ratio, Deinterlacing, Anti-Aliasing
6	to	Select cameras
7		Image optimisation
		PTZ camera functions
		Activate Alarm Outputs
8		Save current image as BMP or JPEG file
9		Set up image drawing mode
10	Display	Event log

WebGuard – WebSearch controls

The following diagram and table set out the functions on the Web Search:

No.	Designation	Function
1		WebGuard Logging out
2		Open Display (WebWatch)
3	DVR	Date/Time, IP Address, User Name
4		Zoom On/Off and image optimisation
5	Camera image	Camera name, Image Aspect Ratio, Deinterlacing, Anti-Aliasing
6		Playback functions
7		Image display modes
8	Time bar	Calendar search and event log
9		Search for date/time
		Calendar search
		Event Search
10		Reload recording data
11		Set up image drawing mode
12		Save any video clip as an EXE file
		Save current image as BMP or JPEG file
		Print image

Using WebGuard

WebGuard permits the following, using an Internet connection

- View current video images
- Search and view recorded records

Requirements:

- The Internet connection is set up and the WebGuard service is activated.
- A PC with Internet access to the DVR must be available.
- Internet Explorer must be installed on the PC.

Using WebGuard

Step	Action
1	Ask your System Administrator about the current access data.
2	Start Internet Explorer.
3	Enter the following informations in the adress field:
	- http.//IP address:Port number (default port address 12088)
	- http://DVRNS server address/DVR name
	- http://www.dvronline.net
4	Enter your User Name (admin), Password (default = blank) and if necessary the port addresses.
5	Select Login. **Result:** WebGuard window is opened.

Specifications DLR3-04/xxx

Model	DLR3-04N/250 (Additional models upon request)
EDP No.	72694
Video standard	PAL/NTSC (auto detection)
Remark	-
Event logs	Unlimited number of entries for alarm/event/text messages, loss of signal
Security against unauthorised use	Key locking, 64 user groups with programmable access (up to 256 users)
Transmission rate	100 images per sec (PAL)
Alarm triggering	E-mail, pager, remote SW (RAS)
Alarm activation	Automatic multi-screen display of alarm images programmable
Remote Control	-
Text display interface	ATM/POS, 10 channels max.
Monitor display	Real-time playback: 25 field images per sec (PAL), 30 field images per sec (NTSC) per camera
Covert camera mode	Programmable
Time synchronisation	Network time log, network time server
System change log	Up to 5000 entries for login/logout, configuration changes, remote access, change of signal connection, disk read/write errors
Zoom function	2x
Playback	Full image and quad image
Post-alarm recording	Up to 15 minutes
VGA	-
Control interface	RS-485 port for PTZ control (verified logs: eneo-Fastrax, Pelco P/D) or keyboard connection for remote control
Activity detection	Programmable 16 x 12 (192) grid, 5 sensitivity settings
Simplex/Duplex/Triplex/ Pentaplex mode	Duplex
Video inputs	1x 1 Vp-p, (F)BAS, 75 Ohm, BNC, loop-through
Spot monitor	no
Video output	1x 1 Vss, (F)BAS, 75 Ohm, BNC
Audio input	4x amplifier input, cinch
Audio output	1x amplifier output, cinch
Resolution	720 x 576 pixels (display)
Compression method	MPEG-4, higher compression rates with same picture quality enable maximum recording times
Recording speed	100 field image per sec at CIF resolution (336 x 272 pixels/PAL), 50 field image per sec at 2CIF resolution (672 x 272 pixels/PAL), 25 field image per sec at D1 resolution (672 x 544 pixels/PAL)

Specifications DLR3-04/xxx, continued

Model	DLR3-04N/250 (Additional models upon request)
Picture size	Basic: 2/2.4 kB; Standard: 4/4.8 kB; High: 8/9.6 kB; Very high: 12/14.4 kB (NTSC/PAL). 2 times larger in High Resolution mode
Hard disk capacity	250 GB SATA hard disk, expandable to as many as 2 internal hard disks Models with higher hard disk capacity upon request
Playback speed	100 field image per sec at CIF resolution (336 x 272 pixels/PAL) and Duplex
Export of picture data	via USB 2.0, CD writer. Network data export: Clip Player, AVI, JPG, BMP
Alarm inputs	4x TTL, programmable as NC/NO (terminal strip)
Alarm outputs	1x directional contact (terminal strip)
Alarm reset	1x TTL (terminal strip)
Alarm messages	System error, hard disk error
Pre-alarm recording	Up to 30 minutes
Recording medium	SATA hard disks, built-in DVD-RW writer
Archiving	-
Menu languages	German, English, Italian, French, Spanish, Polish, Russian, Czech, Hungarian
Ethernet port	10Base-T, 100Base-TX, RJ-45
Remote software	For remote administration and image search function (RAS plus included)
Ports	2x USB, 1x RS-485, 1x RS-232 (remote control/configuration)
Power Supply	100 VAC ~ 230 VAC, 50/60 Hz
Power consumption	approx. 150 W
Temperature range	5°C to 40°C
Housing	Metal with plastic front panel
Colour	Pantone 427C
Dimensions (H x W x D)	88 x 430 x 393 mm
Weight	approx. 6.3 kg

Note: Please refer to www.videor.com for further information.

Accessories

EDP No.	Short description
74088	System keyboard with 3-axis joystick
74092	System keyboard with joystick, 5” monitor
71902	USB mouse for DVR series DXR, DLR3
on request	Hard disks with different storage capacities

Note: Please refer to www.videor.com for further information.

Notes on disposal

Correct disposal of this DVR

WEEE (Waste Electrical & Electronic Equipment)

Applicable in the member states of the European Union and other European countries with a separate collection system

The marking on the DVR and on the documentation stipulates that it must not be thrown away in normal domestic waste at the end of its useful life.

General rules

- ► Avoid uncontrolled waste disposal: Please dispose of this DVR separately from other waste, so as to avoid posing a hazard to the environment and to human health.
- ► Recycle the DVR in order to aid the sustainable reuse of material resources.

Private users

- ► Contact the retailer from whom you purchased the DVR or your competent local authority to find out how you can recycle the DVR in an environmentally friendly way.

Commercial users

- ► This DVR must not be thrown away with trade waste. To clarify the conditions of disposal, check your purchase contract or contact your supplier.
